

# Products Summary

## LAP Series

World's first and best polymer clad coating used by major fiber companies.

## LD Series

Recoat coating is tuned to both UV LED sources and conventional UV lamps.

## XP Series

PFOA & PFOS Free' is guaranteed even under high temperature and oxidation environments.

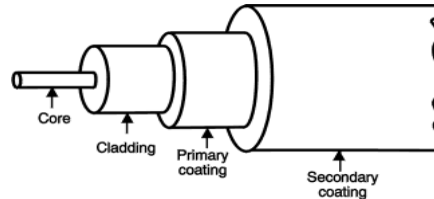

## Optical Adhesives

UV curable optical adhesives

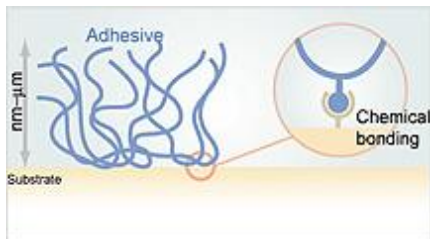

## HT Series

World's first UV curable fluoro-siloxane coating for 150C or higher temperatures.

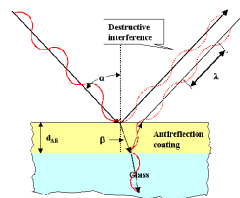

## Protective Coatings

Wet-on-wet UV curable primary and secondary Coatings.

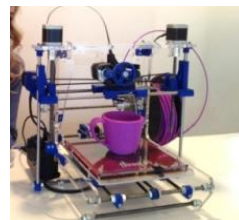

## HA Series

Formulated for strong adhesion to core glass for jacketing and polishing processes in special fibers

## Antireflective Coatings

UV curable formulations suitable for dip and spin coating. (Custom designed for customer specific requirements)

## 3D Printing Inks

Under customer trials. (Custom designed for customer specific requirements)
